EXPERIENCE

Coverfy   Dec. '18 — Present
Software Project Manager / Software Product Owner
- Leading a multidisciplinary team of 6 developers working on Scrum methodology.
- Collecting requirements from different stakeholders, create user stories for new features in Jira, prioritize them, manage scrum ceremonies, solve team member product doubts, validate submissions, and manage releases.
- Coordination and collaboration with the rest of the departments, to guarantee the adaptation of the projects to the needs of the product.
- Technical decisions and validation of the implementation of functionalities.

  Relevant projects:
  - Migration of intranet from PHP Legacy into a new intranet running on docker containers in Azure with React + PHP 7.
  - Implemented PowerBI for extracting relevant data of B2C customers.

  My daily tools are Jira, AWS, PHP, SQL, and GIT.

Seidor   Sept. '18 — Dec. '18
Strategy and Web Consultant / Tech Project Manager
- Tech Project Manager in CRM DAC. This project is an initiative of Institut Municipal d'Informàtica (Ajuntament de Barcelona) that uses Microsoft Dynamics as an integrating tool for the data of all the citizens (3.5 million citizens).
- Analyst programmer and Symfony full stack developer. Web development for large organizations like Emov Car Sharing, Nostrum or Chovi responsible for the development of visualizations of analytical data through Qlik Sense in which they are integrated with WebApps based on PHP/Symfony. This includes setting up the infrastructure (Google App Engine, Azure...), DBA (MySQL), Test-Driven-Design, DDD.

Enalquiler.com   Aug.'12 — Sept. '17
